

SNC-P1

All in one Mpeg-4/Jpeg Network Camera

Advancing to the next level

The SNC-P1 MPEG-4/JPEG network colour camera, is opening unlimited possibilities to an extensive range of Network Video Monitoring applications.

Responding to the growing demand for an affordable and easy-to-use network camera, the SNC-P1 offers a cost-effective solution for a broad range of remote monitoring applications such as retail, offices, manufacturing lines and web casting.

In addition to the industry-standard JPEG compression format, the SNC-P1 utilises the efficient MPEG-4 compression format, which provides smooth video/audio streaming via ordinary broadband network environments such as DSL or CATV. And, thanks to the high compression ratio of the MPEG-4 format, the SNC-P1 can achieve a high

frame rate of up to 30 fps even when bandwidth is limited.

Features

All-in-one MPEG4 Video Network Camera

High Frame Rate up to 30 fps at QVGA resolution

Fixed focus lens requires no adjustment

Smart, sensitive motion vector detection

Benefits

Access your video from anywhere at any time

More picture detail thanks to progressive scan CCD

Get the full picture thanks to two way audio communication

Unattended operation thanks to built-in motion detection

Accessories

Mounting Hardware

**SNCA-HFIXED**

Outdoor fixed camera housing
